

**CLOWNFISH XL II** (epoxy) 5 ft. 10 in., 3 in. thick, 21 1/4 in. wide, 16 in. nose and tail  
This clownfish has plenty of flotation to help you catch smaller waves but can handle the big stuff too. The optional 3rd fin allows you to be very aggressive in your turns. Or ride it with 2 fins for a looser feel. This board is a nice mix between a retro fish and a typical tri-fin thruster. Included removable fins set (2 keels and 1 smaller trailer fin).

**MAGIK Z FISH "MANTA RAY"** (epoxy)

6 ft. 2 in., 2.5 in. thick, 20 in. wide, 15.25 in. nose, 14 in. tail  
The perfect combination between a modern quad-fin shortboard and a fish, our sleek 5'11" Manta gives riders just enough flotation to keep paddle speed up, while offering performance rails that enable snappy, pivotal turns. A quad fin setup and small wings make sure that your tail will stay under control during a precision tube rider. Includes fiberglass removable fin set (4 symmetric sized fins).
